TERMS & CONDITIONS

PVC FLEX SYSTEMS – FOR CUSTOMERS

WARRANTY

- **12-month warranty on materials and workmanship** for PVC Flex Systems supplied and/or installed by NBE.
- PVC Flex Systems include PVC Strip Curtains (PVC01), PVC Swing Doors (PVS01) and PVC Curtain Walls (PVW01).
- The warranty covers manufacturing defects only. PVC components are consumable wear items, and their service life varies with traffic, impact, UV exposure, temperature, wind, air pressure, refrigeration, chemical exposure and frequency of use.
- The warranty does not cover normal wear and tear, scratching, scuffing, abrasion, clouding, shrinkage, stiffening, fading, yellowing, distortion or deterioration resulting from normal use or environmental exposure.
- Damage caused by misuse, forklift or vehicle impact, dragging pallets or equipment, excessive wind, chemical exposure, heat or welding, unauthorised modification or improper installation by others is not covered.

QUOTATION CONDITIONS

- All quotations are subject to a site inspection and confirmation of measurements and fixing points.
- Lead time typically **2–4 weeks**, subject to material availability.
- Progress payments may apply for structural steel, large openings, or custom frames.
- **Approved account customers:** payment terms are strictly **net 30 days.**
- Delays caused by the customer (access, obstructions, incomplete works) may incur additional labour or storage costs.
- Standard PVC materials, hardware and mounting systems are included as specified in the quotation.
- Optional PVC grades, colours, stainless steel hardware, custom supports and specialised configurations may incur additional costs.

INSTALLATION CONDITIONS – CUSTOMER RESPONSIBILITY

The customer must ensure the following prior to installation:

- **Site and structural readiness:** Clear access must be provided, with pallets, racking, vehicles and other obstructions removed. Walls, beams, ceilings, door frames and fixing surfaces must be complete, stable, accessible and suitable for the nominated PVC Flex System.
- Support or structural beams will be supplied and installed by NBE only where included in the quotation.
- **Height access**: Equipment required beyond standard step ladders, including a scissor lift for work above 3.5 m, must be supplied by the customer unless otherwise arranged.
- **Safety:** Traffic stops or pedestrian controls must be arranged where required. The customer must identify services, electrical conduits and concealed obstructions behind fixing surfaces.
- **Environment:** The installation area must be dry and free from excessive dust, wind or water during the works.

BUSINESS & OPERATIONAL CONDITIONS

- Installation is performed during **standard business hours**, unless otherwise agreed.
- Quote includes a **30-minute site induction**; additional time is chargeable.
- NBE Australia is **not affiliated with union or subcontractor associations**, and does not operate under EBA agreements.
- NBE Australia does not accept **retentions, indemnities, or punitive clauses** outside our terms.
- We provide **public liability insurance, WorkCover, OHS policy, and SWMS** upon request.
- NBE acts solely as the manufacturer, supplier and installer of PVC Flex Systems and associated support structures, and not as the building contractor.

TITLE & PAYMENT OWNERSHIP CLAUSE

- All goods remain the **property of NBE Australia** until paid in full.
- **Risk of theft or damage** transfers to the client upon delivery to site.
- If unpaid after 60 days (or per written agreement), NBE Australia may access the site to remove goods.
- If installation is rescheduled due to site readiness or access issues, additional charges may apply.
- The performance and service life of PVC Flex Systems are affected by operating conditions including traffic volume, impact frequency, UV exposure, wind, air pressure, temperature, refrigeration cycles and environmental conditions. These factors are outside NBE Australia's control and do not constitute a manufacturing defect.

TENDER COMPLIANCE STATEMENT

PVC FLEX SYSTEMS – FOR TENDER

NBE Australia (hereafter NBE) confirms compliance with the tender requirements for the PVC Flex Systems Package, subject to the following qualifications and conditions:

1. SCOPE COMPLIANCE

NBE will supply and install PVC Flex Systems, including PVC Strip Curtains, PVC Swing Doors and PVC Curtain Walls, together with the nominated mounting systems, hardware and supporting structures where specified. PVC grades, strip overlap, mounting height, and fixing configuration will comply with the requirements described in the tender documents.

2. WARRANTY COMPLIANCE

NBE provides a 12-month warranty on materials and workmanship for PVC Flex Systems supplied and installed by NBE. PVC Flex Systems include PVC Strip Curtains (PVC01), PVC Swing Doors (PVS01) and PVC Curtain Walls (PVW01). This warranty covers manufacturing defects in the PVC material, hardware and components supplied by NBE, but does not cover:

- scratching, scuffing, clouding, abrasion or other cosmetic wear resulting from normal use;
- shrinkage, stiffening, distortion or deformation caused by temperature, refrigeration conditions, airflow or environmental exposure;
- impact damage caused by forklifts, pallets, vehicles, trolleys or equipment;
- damage caused by misuse, excessive wear, chemical exposure or improper cleaning methods; or
- modification, adjustment or repair carried out by others after installation.

The warranty period should not be interpreted as the expected service life of the product. The performance and service life of PVC Flex Systems vary according to the operating environment, frequency of use and application.

3. EXCLUSIONS

NBE excludes liability for:

- damage caused by forklift impact, dragging pallets, or misuse;
- airflow or pressure-related effects outside NBE's control;
- delays, downtime, or consequential losses;
- works by other trades, including any trimming, sealing, or structural changes not included in NBE's quotation;
- environmental conditions beyond normal warehouse operation (wind, moisture, refrigeration pressure, welding heat unless welding-grade PVC is specified).

4. COMMERCIAL CONDITIONS

- No retentions, liquidated damages, penalties, or back-charges apply unless expressly agreed in writing.
- Pricing assumes clear access, site readiness, and height-access equipment by others.
- NBE does not assume AS4902 head-contractor obligations unless expressly included.
- Structural support beams are included **only if expressly listed** in NBE's quotation.

5. VARIATIONS

Variations may apply where:

- site conditions differ from drawings or tender documentation;
- openings, fixing surfaces, or structural supports are incomplete or unsuitable;
- additional height access or traffic control is required;
- design changes or revised specifications are issued after acceptance.

Any variation will be priced and submitted for approval prior to proceeding.

6. SAFETY & COMPLIANCE

NBE will comply with all site safety requirements and provide SWMS, insurances, and compliance documentation on request. Installation will occur during standard business hours unless otherwise agreed.

This submission is subject to NBE Australia's Standard Commercial Terms and Conditions for Customers (Attached).
